

LUMINANCE MEASUREMENT OF PHOTOLUMINESCENT LOW LOCATION GUIDANCE SYSTEMS

PERMALUX –
SINCE 1998 YOUR
PARTNER FOR MORE
SAFETY ON BOARD

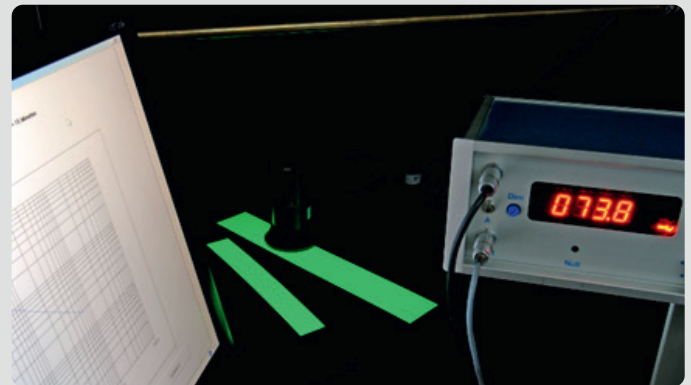

Our photoluminescent Low Location Lighting (LLL) systems have been used in the shipping industry for more than 20 years. Technical innovations combined with modern design, durability, high luminance and reliability are the hallmarks of our products.

As we see ourselves as a long-term partner to our customers we are at your side throughout the entire product life cycle, from design to finished product and maintenance.

Photoluminescent low location lighting systems must be checked for functionality after installation and every five years.

With our service „Guideline® Premium Maintenance“ we offer certified measuring procedures carried out through trained staff worldwide. Through the combination of a manufacturing company for safety products at the highest level and our own quality standards for our personnel, we are your reliable partner.

A decision for a PERMALUX product is a decision for the safety of your guests and crew.
